Re: Rett Syndrome Research Trust Web Application Penetration Tests

To whom it may concern,

Please accept this letter as confirmation that Avertium LLC has conducted a penetration test of the Rett Syndrome Global Registry platform for Rett Syndrome Research Trust. Based on the assessment, the platform demonstrates adherence to current data security best practices as applicable to the scope of the testing conducted.

On May 19th, 2024, Rett Syndrome Research Trust engaged Avertium to perform a web application penetration test on a Rett Syndrome Research Trust application. Avertium performed the penetration test from June 24th through June 28th, 2024. The penetration test scope was defined within the signed rules of engagement.

Avertium adheres to the OSSTMM penetration testing methodology and code of ethics regarding this level and classification of the test. The consultants performing these tests hold at least one certification, such as or comparable to the Offensive Security Certified Professional, Certified Ethical Hacker, or Certified Information Systems Security Professional (CISSP).

The conclusions of this letter are predicated upon the information provided by Rett Syndrome Research Trust during this assessment. Avertium does not guarantee that controls will remain in effect or effective outside of this review process.

For the firm,

*Michael Berardi*
